Leader in
Horticultural
Containers

HC is a proud culmination of many legacy container brands. We continue to transform the horticultural industry through bold leadership, innovative manufacturing, and a comprehensive portfolio of growing container choices ideal for greenhouse, nursery, retail, sustainable, and cannabis growers.

We utilize the latest technologies to manufacture our growing containers and accessories using blow mold, thermoform, injection, co-ex, and vacuum formed production methods. We also offer sustainable fiber and biobased solutions produced with post-consumer and post-industrial materials in various sizes and product offerings.

Here at HC, we provide growers with more choices for their growing containers – guaranteeing they'll find the ideal container solution to satisfy their unique growing needs. From grower to gardener to consumer and more, we're improving our world together.

HC'S SUSTAINABLE PRACTICES

At HC, we believe sustainability is essential to ensuring our customers and our business improves the world as collective stewards of the earth, its citizens, and the products we all develop and cultivate. In addition, designing more environmentally conscious products and making them accessible and affordable to more people benefits our shared economy by normalizing those products and creating demand in the market.

Our facilities in Middlefield, Ohio, Sebring, Florida, and Sparks, Nevada produce growing containers made with post-industrial and post-consumer recycled or reprocessed resins*. Additionally, our Burlington, Canada facility, which produces our full line of fiber containers, utilizes 100% recycled newsprint, corrugate from our facilities, and raw newsprint in the production process, proudly recognized as FSC® 100% Recycled.

**The amount and stream of recycled and reprocessed resin may vary by product*

HC's operations are located in the communities you live and work.

Our corporate offices and manufacturing facilities help provide for hundreds of families in neighborhoods across North America.

What are your office hours for Customer Service?

Our Customer Service Team is available from 8:00 AM – 5:00 PM, Monday through Friday Eastern Standard Time. You can call them during regular business hours at 800-225-7712 or send them an email (customersupport@hc-companies.com) and they will return your message as soon as they return to the office.

How can I purchase your products?

We are proudly represented through the industry's broadest network of dedicated distributors across the United States and Canada. To find a distributor near you, visit hc-companies.com/distributors.

What if containers in my shipment are damaged upon arrival?

Contact our Customer Service Team immediately so we can rectify the situation. Please have your order number ready so they can find your order as quickly as possible to begin the claims process.

Do you offer custom colors for your containers?

We offer a wide array of popular standard colors for the majority of our containers. You'll find what standard colors a container is available in on their individual product pages. If you do not see any options, it's only available in the photographed color. We do have the capability to provide customer colors, but they are based on a minimum quantity order, require additional production time, and would need to be discussed with a sales representative.

Can The HC Companies do custom printing on their containers?

Yes, we can custom print on our greenhouse and nursery containers. Our printing is done in-house directly on your selected containers with traditional silkscreen printing using films and screens. We also offer custom design services with your provided branding. Please note that custom printing is not available on all containers (this will be noted on the individual product listings). We also offer adhesive labeling services for SKU numbers and other product information useful at retail.

HOW TO PURCHASE HC PRODUCTS

HC's growing containers are sold exclusively throughout North America, utilizing a vast network of horticultural distributors committed to the industry. They not only understand the unique challenges and scheduling limitations growers typically experience but are continually searching for applicable and timely solutions to enable your operation to run smoothly and efficiently.

Our intuitive online filtering system will allow you to find the distributor that's right for your growing operation quickly and easily.

HC containers are made from resin comprised of post-consumer, post-industrial recycled materials?

Plus, we regrind any excess materials for reuse in our manufacturing. There's little to no waste in the process.

HOW TO PURCHASE HC PRODUCTS

Our intuitive online filtering system will allow you to find the distributor that's right for your growing operation quickly and easily.

Visit:

hc-companies.com/distributors

WATER IS CRUCIAL FOR A PLANT'S DEVELOPMENT

So is proper drainage for optimum health, which prevents root rot. HC has a wide variety of drainage solutions to fit your watering needs. From four levels of drainage to flood floor and watermat compatibility, HC has designed their containers to satisfy the drainage demands of an ever-changing industry.

WATER IS CRUCIAL FOR A PLANT'S DEVELOPMENT

So is proper drainage for optimum health, which prevents root rot. HC has a wide variety of drainage solutions to fit your watering needs. From four levels of drainage to flood floor and watermat compatibility. HC has designed their containers to satisfy the drainage demands of an ever-changing industry.

Standard Colors

Colors (besides black) are subject to minimums based on SKU. For Injection, colors (besides black and green) are subject to minimums. Offset printing available on some containers.

CUSTOM LABELING

With HC's **adhesive labeling services**, we'll design, print, and adhere your supplied UPC barcode and company information directly on the container – saving on labor costs, while decreasing the time it takes to get your product on retailer shelves.

MANUAL AUTOMATED SOLUTIONS

Looking for significant labor savings without purchasing automated equipment?

For Easy Filling...

Lay tray/pot combinations next to each other and pour potting material over the top. Smooth out excess for quick filling.

1

Empty your box of 4.50 Square Quick Lock Pots (**SQQ04500-pg. 14**) onto a work surface so the bottoms of the pots face the sky. Remove the box.

2

Grab the accompanying tray (**TRK15451-pg. 35**) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

3

Grab the accompanying tray (**TRK15451-pg. 35**) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

TRAYS, FLATS AND SHEETS

Manufactured exclusively from nearly **100% recycled materials**, our trays, flats, and sheets are available in a wide variety of cell configurations and capacities.

- Easily denest for soil filling and rooting in automated operations
- Consistently formed for overall strength and durability
- Feature uniform drainage holes
- Carefully trimmed for accuracy

MANUAL AUTOMATED SOLUTIONS

Looking for significant labor savings without purchasing automated equipment?

For Easy Filling...

Lay tray/pot combinations next to each other and pour potting material over the top. Smooth out excess for quick filling.

1

Empty your box of 4.50 Square Quick Lock Pots (**SQQ04500-pg. 14**) onto a work surface so the bottoms of the pots face the sky. Remove the box.

2

Grab the accompanying tray (**TRK15451-pg. 35**) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

3

Grab the accompanying tray (**TRK15451-pg. 35**) with the bottom facing the sky and firmly push against the bottom of the pots until you feel a "snap."

ARE YOU SUPPORTING YOUR PLANTS?

Trellis Support Systems
A container trellis is a great way to merchandise vining and crawling plants at retail, while training the plant to grow vertically. They also help prevent vining and crawling plants from entangling during shipping.

Support Rings & Cages
Plants with weighty flowers often utilize plant support rings and cages to help brace delicate stems from falling over and breaking. They also help protect the plant during shipping.

Plant support systems encourage more uniform and healthy growth, ensuring the plant will grow optimally for the duration of the season.

Support systems are virtually undetectable due to their earthy green or black tones, which perfectly coordinate with lower stems and foliage.

Automation Compatible

Look for this icon which identifies nursery containers that are compatible with a variety of automated growing equipment.

AUTOMATION FRIENDLY CONTAINERS

Automated equipment is a popular solution for growers facing increased labor shortages at their operation.

If you are not using an automation compatible container with your new state-of-the-art equipment, you run the risk of internal damage which may not be covered under the manufacturer's warranty.

Here at HC, we have a full line of growing containers that are compatible with a variety of automated growing equipment such as pot dispensers, conveyors, and fork systems to name a few.

Simply look for this icon, or in the product tables under "Special Attributes," for automation compatible containers from HC.

BRANDED PLANTER PROGRAMS

Increase consumer confidence and sell-through at retail by joining some of the top branded plant programs* in the industry or let us help you create your own custom branded container!

WHY BRANDED CONTAINERS?

- » Colorful packaging design influences customer purchasing
- » Creates a perceived value over the competition
- » An opportunity to provide invaluable information directly onto the container
- » Expands and supports the reach of your brand
- » Four-color printing capability done in-house at HC (*custom design services available*)

For plant programs and more information, visit hc-companies.com/branded-planters

*Minimums required based on individual products.

DID YOU KNOW?

Our trays, flats and sheets are manufactured exclusively from nearly **100% recycled materials** and are available in a wide variety of cell configurations and capacities.

They easily denest for soil filling and rooting in automated operations, are consistently formed for overall strength and durability, feature uniform drainage holes, and are carefully trimmed for accuracy.

CERTIFICATIONS & PRODUCT LINES

S U S T A I N A B L E

HC is proud to be a certified partner of these esteemed organizations for our line of fiber based growing containers.

FOREST STEWARDSHIP COUNCIL® (FSC)

Products that bear the “FSC® 100% Recycled” designation have been verified as being made from 100% recycled content (either post-consumer or pre-consumer reclaimed materials). The use of FSC Recycled products can help to alleviate the demand on sources of virgin material, thereby helping to protect the world’s forests. Choosing products with the FSC designation ensures that both customers and organizations are doing their part to preserve forests across the globe.

USDA’S BIOPREFERRED® PROGRAM

The USDA Certified Biobased Product label is designed to provide useful information to consumers about the biobased content of the product. The label assures a consumer that the product contains a USDA-verified amount of renewable biological ingredients. Biobased products are derived from plants and other renewable agricultural, marine, and forestry materials. Biobased products generally provide an alternative to conventional petroleum derived products and include a variety of offerings such as lubricants, detergents, inks, fertilizers, containers, and bioplastics.

SUSTAINABLE PRODUCT LINES

EcoGrow®

EcoGrow® containers breathe like clay pots, provide an optimal environment for root systems and break down quickly when planted or worked into the soil. EcoGrow molded fiber pots are suitable for organic production under NOP and COR.

- » Made of 100% Biobased Content – USDA BiopREFERRED Certified
- » Made of 100% Recycled Fiber – Recycled 100% Certified
- » Produced in a closed-loop water recycling facility
- » Produced with recycled newsprint

FIBER® GROW

FiberGrow® products are molded using a slurry of fibers and binding agents in order to increase their strength and durability in such applications as planters, hanging baskets, and other large containers. A wax coating is available to increase the longevity of the container.

- » Made of 82% Biobased Content – USDA BiopREFERRED Certified
- » Made of 100% Recycled Fiber – Recycled 100% Certified
- » Produced in a closed-loop water recycling facility
- » Produced with recycled newsprint

DID YOU KNOW?

?

DID YOU KNOW?

HC fiber growing containers are produced using recycled newspaper in our closed-loop manufacturing facility in Canada to eliminate water waste.

They breathe like clay pots, provide the perfect environment for root development and insulation, are automation friendly, contaminant free, durable and in some cases, certified for organic farming.

HOW DRAINAGE WORKS IN FIBER CONTAINERS

Our fiber growing containers allow moisture to move freely throughout the walls of the container for optimal drainage and healthy root systems. Much like clay pots, our fiber growing containers ensure the entire plant can breathe – maintaining necessary oxygen levels while limiting root rot caused by over-watering.

MORE BENEFITS WITH FIBER

HC fiber hanging baskets are produced using **recycled newspaper** in our closed-loop manufacturing facility in Canada to eliminate water waste. They're incredibly durable, able to withstand the continual weight of moist soil, help insulate root systems, offer superior drainage and moisture retention, and are highly customizable based on your needs.

A DURABLE GROWING CONTAINER THAT'S MINDFUL OF THE ENVIRONMENT

Made from sustainably sourced wood pulp, each BioPax™ growing container promotes less waste while offering an optimized end-of-life compared to traditional containers.

- ✓ Designed for reuse and responsible disposal
- ✓ Will break down over time with NO microplastics left behind
- ✓ Non-GMO and non-toxic
- ✓ No harmful PFAS or heavy metals
- ✓ Certified biobased material – not petroleum
- ✓ Great for automation

What is BioPax™ made of?

Sustainably-sourced wood pulp, compounded with modifiers and additives.

Is BioPax™ certified?

BioPax™ containers are part of the USDA BioPreferred® Program. The USDA Certified Biobased Product label is designed to provide useful information to consumers about the biobased content of the product. The label assures a consumer that the product contains a USDA-verified amount of renewable biological ingredients.

So, is BioPax™ plastic?

BioPax™ is a resin code #7 (other) and is considered a bioplastic, which is unlike traditional plastic, as it is not derived from petroleum.

What's a bioplastic?

Appearing like traditional petro-plastics, bioplastics are resin-based and produced from renewable sources, like agricultural byproducts and substances. It's important to note that not all resins result in traditional petroleum-based plastic.

What do I do with this container when I am done using it?

Strong enough to reuse, BioPax™ plant pots can be disposed with other waste materials.

So, you're saying BioPax™ is biodegradable?

Current ASTM standards (ASTM6400) deem products as "biodegradable" if they break down in less than one year. Due to its wall thickness, the rate of degradation exceeds the one-year threshold, however, current testing/data indicates the product will degrade over an estimated three to five years. The rate could depend on environmental conditions and article shape and thickness; variation of resin/material blends may impact the break down rate as well.

BIG03000

3.00 Round BioPax™ Container

Outside Diameter: 3.00 in / 7.62 cm
Height: 2.81 in / 7.14 cm
Maximum Liquid: 7.36 oz / 218 ml
Quantity Per Case: 560
Weight: 0.04 lbs/unit

BIG04500

4.50 Round BioPax™ Container

Outside Diameter: 4.50 in / 11.43 cm
Height: 5.63 in / 14.30 cm
Maximum Liquid: 1.38 pt / 655 ml
Quantity Per Case: 225
Bulk Quantity: 25,000
Weight: 0.09 lbs/unit
